/Controllers/HomeController.cs

```csharp
// Sends the user to the PatchNotes webpage
0 references
public IActionResult PatchNotes()
{
    return View();
}
```

/Views/Home/Index.cshtml

I removed the jumbotron code at the bottom of this page. The code created box hyperlinks with patch notes information. I then moved the code over to the new PatchNotes webpage.

/Views/Home/PatchNotes.cshtml

This is where you add the jumbotron code to display the box hyperlink patchnotes.

```html
@{
    ViewData["Title"] = "PatchNotes";
}
<div class="jumbotron jumbotron-fluid">
    <div class="container text-center mt-lg-5 mb-lg-5">
        <h1 class="display-4">BucStop News</h1>

        <div class="container my-4">
            <div class="row row-cols-1 g-4">
                <div class="col">
                    <div class="card h-100 shadow-sm" style="max-width: 500px; margin: 0 auto;">
                        <div class="card-body">
                            <a asp-controller="Home" asp-action="TwoDotFour" class="text-decoration-none">
                                <h1 class="card-title">Version 2.4</h1>
                            </a>
                        </div>
                    </div>
                </div>
                <div class="col">
                    <div class="card h-100 shadow-sm" style="max-width: 500px; margin: 0 auto;">
                        <div class="card-body">
                            <a asp-controller="Home" asp-action="TwoDotThree" class="text-decoration-none">
                                <h1 class="card-title">Version 2.3</h1>
                            </a>
                        </div>
                    </div>
                </div>
            </div>
```

/Views/Shared/_Layout.cshtml

This will add a hyperlink at the top of the index page that will take us to our new PatchNotes page.

```html
        <a class="nav-link text-dark" asp-area="" asp-controller="Home" asp-action="Index">Home</a>
    </li>
    <li class="nav-item">
        <a class="nav-link text-dark" asp-area="" asp-controller="Games" asp-action="Index">Games</a>
    </li>
    <li class="nav-item">
        <a class="nav-link text-dark" asp-area="" asp-controller="Home" asp-action="Privacy">About</a>
    </li>
    <li class="nav-item">
        <a class="nav-link text-dark" asp-area="" asp-controller="Home" asp-action="Admin">Admin</a>
    </li>
    <li class="nav-item">
        <a class="nav-link text-dark" asp-area="" asp-controller="Home" asp-action="GameCriteria">Add Your
        Game!</a>
    </li>
    <li class="nav-item">
        <a class="nav-link text-dark" asp-area="" asp-controller="Home" asp-action="PatchNotes">Patch Notes</a>
    </li>
```
