  ↓
```

- The above shows the code I changed. I hard-coded the version number by changing 2.0.0 to 2.4.0.
- I then changed the link that the version number takes you to when clicked. Now, it will show 2.4.0 and it will take you to version 2.4.0 in GitHub.

Velocity

- Altogether with coding, testing, creating a pull request and getting it approved to be pulled into Sprint6, and documenting what I did, took about 10 mins.
